## **MEDIA ADVISORY:**

**Trumbull County Partnership, Area Government Representative test SecureView, a clearboard alternative to plywood for securing vacant homes**

**WHO:** Trumbull County Partnership – Matt Martin, Executive Director  
SecureView – Howard Wedren, President and Co-Founder  
Trumbull County Treasurer Sam Lamancusa  
Warren Mayor William D. Franklin  
Members of Warren City Council  
Community members

**WHAT:** A demonstration of SecureView, a patented state-of-the-art technology that secures unoccupied structures without exposing vacancy. SecureView will be installed on a window and door of a vacant home in the Trumbull County Partnership's inventory and local government and non-profit representatives will have the opportunity to put the product through a whack-it durability test.

Refreshments will be served.

**WHEN:** Friday, December 19, 2014 at 11 am  
*Remarks will precede demonstration*

**WHERE:** 670 Mercer Road, Warren, Ohio

**WHY:** At SecureView, we've created a revolutionary way to secure vacant and abandoned properties without exposing their vacancy to onlookers. Designed to look like traditional windows, our patented, recycled, alternative board-up system provides clear views and lets in natural light. This, in turn, enhances marketability and safety, and allows first responders to see inside in the event of an emergency. SecureView is

also virtually unbreakable, which means it has the wherewithal to protect property from intrusion, and reduce the crime and squatting so often associated with plywood and steel board ups.

SecureView can be modified by the customer onsite to fit any window, and is quickly and easily installed using a simple but effective compression bolt system. Once in place, SecureView proves to be an effective solution to the issue of blight, increasing a property's value due to improved curb appeal, which in turn helps to stabilize the entire neighborhood.
